98 \$14.00.

Cell biology

- 1 Swelling-induced decrease in spontaneous pacemaker activity of rabbit isolated sino-atrial node cells *M. Lei and P. Kohl*
- 13 Partial inhibition of Na, K-ATPase activity in cultured rabbit non-pigmented ciliary epithelium following an episode of cytoplasmic ATP depletion *S. Kuwahara, S. Chin and N. A. Delamere*

Polypeptides

- 21 Increased endothelin ET_B contractile activity in cultured segments of human temporal artery *L. R. White, K. H. Leseth, R. Juul, M. Adner, J. Cappelen, J. Aasly and L. Edvinsson*
- 29 Renal tubular transport and metabolism of carboxyamidated and glycine-extended gastrins in pigs *C. Palmås Hansen, F. Stadil and J. F. Rehfeld*
- 39 Forskolin-induced down-regulation of Na⁺, K⁺-ATPase activity is not associated with internalization of the enzyme *R. M. Andersson, S. X. J. Cheng and A. Aperia*
- 47 Bradykinin causes contraction in rat uterus through the same signal pathway as oxytocin *I. Wassdal, G. Nicolaysen and J.-G. Iversen*

Cardiovascular

- 53 Cardiac accumulation of citrate during brief myocardial ischaemia and reperfusion in the pig *in vivo* *B. Hassel, A. Ilebekke and T. Tonnessen*
- 61 Microsphere infusion reverses vasoconstrictor-mediated change in hindlimb oxygen uptake and

energy status *M. A. Vincent, S. Rattigan and M. G. Clark*

Exercise

- 71 Regional differences in the effect of exercise intensity on thermoregulatory sweating and cutaneous vasodilation *N. Kondo, S. Takano, K. Aoki, M. Shibasaki, H. Tominaga and Y. Inoue*
- 79 Rapid recovery of power output in females *P. W. Cherry, H. K. A. Lakomy, L. H. Boobis and M. E. Nevill*
- 89 The influence of PaO₂, pH and SaO₂ on maximal oxygen uptake *H. B. Nielsen, P. Madsen, L. B. Svendsen, R. C. Roach and N. H. Secher*
- 99 Proximal tubular function in adult rats treated neonatally with enalapril *G. Guron, A. Nilsson, P. P. Leyssac, B. Sundelin and P. Friberg*
- 107 Regulation of cell cyclic AMP in medullary thick ascending limb of Henle in a rat model of chronic renal failure *C. Bertuccio, F. R. Ibarra, O. Pignataro, J. Toledo, L. Paz, E. Arrizurieta and R. S. Martin*

Rapid communications

- 115 Opposite effects of adrenaline on plasma ammonia and blood lactate levels in humans *J. Svedenbag and J. Nowak*
- 117 Possible β 3-adrenoceptor-mediated relaxation of the human detrusor *Y. Igawa, Y. Yamazaki, H. Takeda, M. Akabane, Y. Ajiwawa, T. Yoneyama and O. Nishizawa*

Muscle

- 119 Growth hormone induces muscle fibre type transformation in growth hormone-deficient rats *J. R. Dugaard, J. L. Laursen, B. S. Hansen and E. A. Richter*
- 127 Is post-tetanic potentiation, low frequency fatigue (LFF) and pre-contraction depression (PCD) coexistent in intermittent isometric exercises of maximal intensity? *A. Skerjydas and P. Zacharjovas*
- 135 Skeletal muscle Na⁺/H⁺ exchange in rats: pH dependency and the effect of training *C. Juel*
- 141 Exercise-induced decreases in sarcoplasmic reticulum Ca²⁺-ATPase activity are attenuated by high resistance training *H. J. Green, F. Grange, C. Chin, C. Gorehan and D. Ranney*
- 147 Effects of creatine monohydrate ingestion in sedentary and weight-trained older adults *S. Bermon, P. Venembre, C. Sachet, S. Valour and C. Dolisi*
- 157 Effect of α -adrenoceptor stimulation on oxygen consumption and triglyceride/fatty acid cycling after exercise *E. Borsheim, R. Bahr and S. Knardahl*

Cardio-vascular

- 167 Left ventricular function in endurance runners during exercise *M. Jensen-Ustad, F. Bouvier, M. Nejat, B. Saltin and L.-Å. Brodin*
- 173 Effects of magnesium and glucose, insulin, potassium (GIK) solution on the action potential parameters of guinea-pig atrial muscle *M. P. Ingemansson, P. Arlock and S. B. Olsson*
- 181 Comparison of the cellular electrophysiological characteristics of canine left ventricular epicardium, M cells, endocardium and Purkinje fibres *B. Balati, A. Varro and J. G. Papp*
- 191 Contrasting effects of platelet-derived growth factor (PDGF) isomers on mitogenesis, contraction and intracellular calcium concentration in human vascular smooth muscle *S. Hafizi, R. Nobin, S. P. Allen, A. H. Chester and M. H. Yacoub*
- 201 The capillary filtration coefficient for evaluation of capillary fluid permeability in cat calf muscles *L. Kongstad and P.-O. Grände*
- 213 Effects of endothelin receptor type A antagonism and nitric oxide synthase inhibition on cerebral

blood flow in hypertensive rats *S.-O. Granstam, E. Granstam, B. Fellström and L. Lind*

Secretions

- 219 The bumetanide-resistant part of forskolin-induced anion secretion in rat colon *G. Schultzeif, S. Hörger and M. Diener*

- 229 Modulation by nitric oxide of gastric acid secretion in toads *M. Molero, I. M. Hernandez, P. Lobo, P. Cardenas, R. Romero and J. Chacin*

Volume 164, Number 3, November 1998

Urinary tract

- 237 Renal nerve stimulation restores tubuloglomerular feedback after acute renal denervation *J. Kurkus, C. Thorup and A. E. G. Persson*
- 245 Autonomic nervous influence of the female guinea-pig urinary bladder during the oestrous cycle *Y.-A. Liu, E. Andersson, M. Hammarström and B. Larsson*

Cardiovascular

- 251 Changes in peak oxygen uptake and plasma volume in fit and unfit subjects following exposure to a simulation of microgravity *V. A. Convertino*
- 259 Cardiovascular and muscular adaptations to combined endurance and strength training in elderly women *A. K. Ferketich, T. E. Kirby and S. E. Alway*
- 269 Contribution of pH, diprotonated phosphate and potassium for the reflex increase in blood pressure during handgrip *R. Boushel, P. Madsen, H. B. Nielsen, B. Quistorff and N. H. Secher*
- 277 Albumin infusion in humans does not model exercise induced hypervolaemia after 24 hours *A. Haskell, C. M. Gillen, G. W. Mack and E. R. Nadel*
- 285 α_2 -adrenoceptor activation may trigger the increased production of endothelium-derived nitric oxide in skeletal muscle during acute haemorrhage *U. Ekelund, S. Mellander and J. Björnberg*

Skeletal muscle

- 293 Initiation of increase in muscle sympathetic nerve activity delay during maximal voluntary contraction *I. Hashimoto, M. Miyamura and M. Saito*
- 299 Fibre-type specific expression of fast and slow essential myosin light chain mRNAs in trained human skeletal muscles *K. Jostarndt-Fögen, A. Puntschart, H. Hoppeler and R. Billeter*

Gastrointestinal

- 309 β -adrenergic stimulation of cellular K^+ uptake in rat distal colon *R. Aizman, O. Aizman and G. Celsi*
- 317 Intraduodenal neuropeptide levels, but not plasma levels, vary in a cyclic fashion with the migrating motor complex *E. Näslund, L. Backman, E. Theodorsson and P. M. Hellström*
- 325 Glucose consumption by various tissues in pregnant rats: effects of a 6-day euglycaemic hyperinsulinaemic clamp *A. G. Nieuwenhuizen, G. A. Schuling, A. Bonen, A. M. J. Paans, W. Vaalburg and T. R. Koiter*

- 335 Erratum

- 337 Announcement

Volume 164, Number 4, December 1998

Vascular Smooth Muscle Symposium

- 339 Preface to the third *Acta Physiologica Scandinavica* international symposium on signalling mechanism in vascular smooth muscle *M. Mulvaney, C. Aalkjær, A. Arner and P. Hellstrand*

Intra- and intercellular architecture

- 341 The cytoskeleton of the vertebrate smooth muscle cell *J. V. Small and M. Gimona*
- 349 Gap junctions in vascular smooth muscle *P. R. Brink*

Molecular aspects of acto-myosin interaction

- 357 Molecular mechanics of two smooth muscle heavy meromyosin constructs that differ by an insert in the motor domain *A.-M. Lauzon, K. M. Trybus and D. M. Warshaw*

- 363 Cross-bridge cycling in smooth muscle: a short review *A. Arner and U. Malmqvist*
- 373 Inhibitory mechanisms for cross-bridge cycling: the nitric oxide-cGMP signal transduction pathway in smooth muscle relaxation *R. A. Murphy and J. S. Walker*

Regulation of acto-myosin interaction

- 381 Regulation of the crossbridge cycle: the effects of MgADP, LC₁₇ isoforms and telokin *A. V. Somlyo, J. D. Matthew, X. Wu, A. S. Khromov and A. P. Somlyo*
- 389 Control of crossbridge cycling by myosin light chain phosphorylation in mammalian smooth muscle *T. M. Butler and M. J. Siegelman*
- 401 Structural interactions between actin, tropomyosin, caldesmon and calcium binding protein and the

- regulation of smooth muscle thin filaments
S. B. Marston, D. Burton, O. Copeland, I. Fraser, Y. Gao, J. Hodgkinson, P. Huber, B. Levine, M. El-Mezgueldi and G. Notarianni
- 415 Regulation of smooth muscle actin-myosin interaction and force by calponin *S. J. Winder, B. G. Allen, O. Clément-Chomienne and M. P. Walsh*
- 427 Caldesmon: binding to actin and myosin and effects on elementary steps in the ATPase cycle
J. M. Chalovich, A. Sen, A. Resetar, B. Leinweber, S. Fredericksen, F. Lu and Y.-D. Chen
- Receptor activation**
- 437 From pharmacomechanical coupling to G-proteins and myosin phosphatase *A. P. Somlyo and A. V. Somlyo*
- 449 Involvement of small GTPases in the regulation of smooth muscle contraction *G. Pfitzer and A. Arner*
- 457 Role of tyrosine phosphorylation in excitation-contraction coupling in vascular smooth muscle
A. D. Hughes and S. Wijetunge
- Myosin light chain phosphorylation**
- 471 Myosin light chain kinase: functional domains and structural motifs *J. T. Stull, P. J. Lin, J. K. Krueger, J. Trewbella and G. Zhi*
- 483 Myosin phosphatase: subunits and interactions
D. J. Hartsborne
- Second messengers**
- 495 PKC-dependent signalling mechanisms in differentiated smooth muscle *K. G. Morgan and B. D. Leinweber*
- 507 Nitric oxide - cyclic GMP pathway regulates vascular smooth muscle cell phenotypic modulation: Implications in vascular disease
T. M. Lincoln, N. B. Dey, N. J. Boerth, T. L. Cornwell and G. A. Soff
- 517 On the cellular mechanism for the effect of acidosis on vascular tone *H.-L. Peng, A. Ivarsen, H. Nilsson and C. Aalkjær*
- 527 A common pathway for regulation of nutritive blood flow to the brain: arterial muscle membrane potential and cytochrome P450 metabolites *D. R. Harder, R. J. Roman, D. Gebremedhin and A. R. Lange*
- 533 Lipid second messengers derived from glycerolipids and sphingolipids, and their role in smooth muscle function *J. Ohanian, G. Liu, V. Ohanian and A. M. Heagerty*
- Control of membrane potential**
- 549 K^+ channel modulation in arterial smooth muscle
N. B. Standen and J. M. Quayle
- 559 Interactions between membrane potential and intracellular calcium concentration in vascular smooth muscle *H. Nilsson*
- Calcium homeostasis**
- 567 Confocal imaging of calcium release events in single smooth muscle cells *T. B. Bolton and D. V. Gordienko*
- 577 Ca^{2+} channels, ryanodine receptors and Ca^{2+} -activated K^+ channels: a functional unit for regulating arterial tone *J. H. Jagger, G. C. Wellman, T. J. Heppner, V. A. Porter, G. J. Perez, M. Gollasch, T. Kleppisch, M. Rubart, A. S. Stevenson, W. J. Lederer, H. J. Knot, A. D. Bonev and M. T. Nelson*
- 589 The role of phospholamban and SERCA3 in regulation of smooth muscle -endothelial cell signalling mechanisms: evidence from gene-ablated mice *R. J. Paul*
- Synergism of growth and contractile mechanism**
- 599 Intracellular targeting and protein kinase C in vascular smooth muscle cells: specific effects of different membrane-bound receptors *H. Haller, C. Maasch, C. Lindschau, M. Brachmann, K. Buchner and F. C. Luft*
- 611 MAP kinases and vascular smooth muscle function *E. Takahashi and B. C. Berk*
- 623 Molecular control of vascular smooth muscle cell differentiation *G. K. Owens*
- 637 Long-term effects of intracellular calcium and growth factors on excitation and contraction in smooth muscle *P. Hellstrand*
- 645 Author index
- 649 Subject index
